Comments (Social landlord contextual information)

The high staff turnover was due to two fixed term modern apprenticeships coming to an end. No other staff left during the year.

Comments (Overall satisfaction)

The tenant satisfaction survey was carried out in August 2020. This was towards the end of the first Covid-19 lockdown which we suspected may affect the results but we thought it was important to get feedback from tenants on their experience during lockdown. Usually the independent researcher carries out face-to-face interviews with tenants, but this time it was by phone. This also may have had an impact on the results.

The sample size of 20% covered all the contracts that our stock was renovated or built. Different apartments sizes and locations were surveyed for each contract. A 100% external survey was carried out. The database was populated to ensure 100% coverage. Additionally, energy efficiency surveys were undertaken to approx. 20% of properties to identify compliance against future EESSH targets. A desktop survey was also undertaken on a 48 unit new build site which hadn't been handed over in March 2019 which was incorporated within the life cycle costing.

Comments (Housing quality and maintenance)

Generally all aspects of maintenance performance has been affected by the impact of Covid-19.

Indicator 9 - During lockdown 1 we advised our tenants early on, via social media and letter, that only essential repairs would be undertaken which resulted in a lower number of non-emergency repairs being reported. Those who did call were advised that they should call back. At lockdown 2, routine repairs were reported which we held on file until we entered level 3. Routine repair orders were then generated from the dates that they were reported. The impact of Covid will therefore be seen more in reporting year 2021/22.

Indicator 10 - 29 repairs outwith locally agreed timescale targets is a significant increase and has a large impact on performance. Covid-19 impacted on performance against this indicator due to contractors furloughing staff and materials not being available, though it is difficult to quantify this.

Comments (Neighbourhood & community)

The tenant satisfaction survey was carried out in August 2020. This was towards the end of the first Covid-19 lockdown which we suspected may affect the results but we thought it was important to get feedback from tenants on their experience during lockdown. Usually the independent researcher carries out face-to-face interviews with tenants, but this time it was by phone. This also may have had an impact on the results.

We suspended our estate caretaking service during the first lockdown and this may also have impacted on tenant satisfaction with our management of the neighbourhood.

Comments (Access to housing and support)

Indicator 30 - We have calculated that Covid-19 added a total of 249 days to the void re-let figure due to no repairs being carried out during the first lockdown, delays in families returning keys following a death and leaving voids empty for 72 hours before we entered to carry out an inspection/repairs. We have calculated that the average void period would have been 39 days without Covid-19.

Indicator 21 - Total number of working days to complete all adaptations from the date that the Occupational Therapist (OT) referral was received is 149 days. One adaptation was delayed by OT until after lockdown resulting in it taking 151 days.

Indicator 16 - We have included under other a let through an assignation. The tenancy was sustained for more than a year.

Comments (Getting good value from rents and service charges)

Indicator 18 - Covid-19 affected our performance against this indicator. We have calculated that the void loss would have been £7,783 or 0.49% without the impact of Covid-19.

Indicator 25 - The satisfaction survey was carried out towards the end of the first lockdown. Tenants perception of value for money may have been affected by the reduced service and contact with staff during the lockdown.
